

A new way to apply for school transportation

During spring, there will be a new application procedure for school transport and bus cards for pupils in compulsory school. Guardians can apply via an e-service on the municipality website and login is possible with e-identification. If you do not have an e-identification, you can get one from your bank.

This also applies to you with children who already have school transport and bus cards. The new application procedure does not apply to the special schools (särskola) nor upper secondary schools.

All municipalities in Dalarna have been working together with Dalatrafik for some time now in order to streamline the management of bus cards and school transport. The goal of these changes are, among other things, better planned bus traffic and thus less environmental impact as well as reduced costs.

Information on how to apply will be announced in advance before the application is to be made. If you have questions already now, contact the school transport administrator via e-mail
